

TES 295[®] Transmission Fluid

Allison Approved Fluids
Engineered to Deliver Superior Performance

“Whatever leaves this shop over my name must be of the finest work possible.”

\ James A. Allison

A Lasting Commitment

At Allison Transmission, quality isn't just a goal. It's a promise—a promise to engineer the highest quality transmissions in the world. But this promise doesn't end after the transmissions are sold. Allison ensures that our high quality automatic transmissions endure with Allison approved transmission fluids.

Quality From Start to Finish

Since Allison's beginning, our founder James A. Allison stated that quality is first and foremost. In fact, Allison Transmission became the world's leading producer of fully automatic transmissions through proven quality from start to finish. Our work doesn't stop when an Allison transmission leaves the factory—we work to maintain the value and quality of an Allison transmission over its life by approving transmission fluids that are comprehensively tested to comply with Allison Transmission product standards.

Only The Best

Because Allison transmissions are of the highest quality, they deserve superior fluids. Allison TES 295[®] approved fluids keep your transmission running like an Allison should. Just like the Allison Automatics themselves, the Allison TES 295[®] specification was developed after years of stringent research and testing to ensure the highest quality fluid for the highest quality transmissions. Due to the high level of quality, TES 295[®] is required to be used in combination with the Allison Extended Transmission Coverages (ETC).

Long Live Your Allison Transmission

Why are Allison TES 295[®] approved transmission fluids the best option for Allison Automatics? Because the specification was developed by people who know Allison best. Allison TES 295[®] approved fluids provide extended drain intervals and offer thermal and viscosity advantages over conventional petroleum based fluids, as well as other synthetic fluids. All Allison TES 295[®] approved fluids are synthetic based, which offer improved viscosity that other fluids can't offer. Only Allison approved transmission fluids are formulated for the unique components of an Allison Automatic. Allison Transmission has developed a fluid and filter calculator, which provides change interval information. For more information, please visit allisontransmission.com/parts-service.

Benefits of TES 295®

Benefits	TES 295®
Extended Drain Intervals	Yes
Enhanced Transmission Performance	Yes
Lower Operating Expenses	Yes
Offers Optimum Transmission Protection	Yes
Backed By An Allison Factory Warranty	Yes
Supported By Allison Global Service Network	Yes

The Bottom Line

Purchasing an Allison Automatic will help you increase productivity and the bottom line. The same goes for Allison approved fluids. Allison TES 295® approved fluid is made to optimize the performance of an Allison by extending drain intervals, extending the life of the product, lowering maintenance costs and reducing downtime, which will end up saving Allison transmission owners money over time. To add value to your business while improving your bottom line, choose Allison TES 295® approved transmission fluid.

Don't Take a Chance With Your Reputation

Allison TES 295® approved fluids position Allison owners for on-the-job success, outperforming and outlasting conventional transmission fluids. While you may save a little by buying non-Allison approved fluids, you may also be compromising on maintenance costs and the long life of your transmission. Don't put your people, vehicles or revenues at risk to save a little up front. It's taken a long time to build your reputation. Trust it only to Allison approved fluids.

We've Got It All

From on-highway to off-highway vocations, we have a current listing of all Allison Transmission approved fluids for each application. Visit our website to see our entire list of fluids at allisontransmission.com/parts-service.

A World of Support

From our headquarters in Indianapolis, Indiana, USA, to our manufacturing plants in Hungary and India, to approximately 1,500 Allison Authorized Distributors and Dealers around the globe, you are never far from the products, training, service and support you demand.

Our support starts from the moment an Allison transmission is specified. We work with you to ensure that the model and ratings fit your engine to create a tailored package of powerful performance and reliable efficiency. When you need parts or service, you can count on global access to factory-trained specialists and Allison Genuine Parts™.
